INDUSTRIAL FLOORING Ltd.

APPLICATORS OF ADVANCED SEAMLESS RESIN FLOOR SYSTEMS  
PROVIDING SAFE AND HYGIENIC WORKING ENVIRONMENTS

In association with  
**FLOOR PAINTERS.CO.UK**

A comprehensive guide to commercial and industrial floor painting.

---

## WELCOME TO CAT INDUSTRIAL FLOORING LTD.

---

Customer satisfaction is what CAT believes is important for the growth and development of any business.

Based on this from the companies birth in March 2000, our customers satisfaction has always been 100%. An achievement we are proud of.

---

## QUALITY MATERIALS AND MANUFACTURERS.

---

We only use manufacturers with proven track records with the knowledge and technical resources to supply materials of the highest standard used over many years with success in various industrial and commercial environments.

---

## OUR STAFF.

---

All our staff are fully trained with many years experience in the application of industrial floor and wall products.

Our management team have over forty years site experience in the specification and installation of polyurethane, epoxy and cementitious industrial floor & wall products.

NEBOSH qualified staff ensure that all Health & Safety requirements are completed with ensuring the safety and well-being of our employees and also the staff and customers of our clients.

---

## BENEFITS OF A RESIN FLOORING SYSTEM.

---

- Hygienic and easy to clean.
- Hard wearing
- Resistant to a wide range of aggressive chemicals, impact and abrasion.

### Slip Resistant Coatings and Screeds.

Ideal for steel or concrete ramps and walkways requiring extra grip in wet conditions.

### Coatings.

Polyurethane, epoxy and fast curing MMA systems.

### Decorative Floor & Wall System.

- Polyurethane, epoxy and terrazzo.
- MMA quartz.
- Wall flake systems.
- Stone carpet systems.

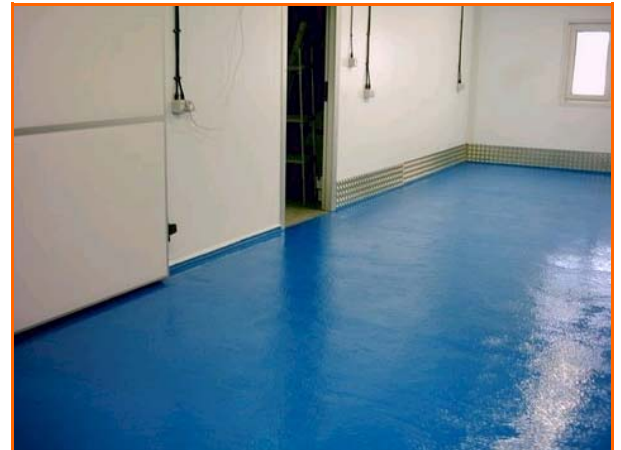

### Screeds.

Polyurethane, epoxy, polymer, quartz and MMA.

Trowel applied, profile finish providing slip resistance in wet areas. Ideal for medium to heavy industrial or production environments

### Cementitious Screeds

- Refurbishment of damaged / spalled concrete.
- Fast installation time
- Hardwearing
- Concrete Repairs

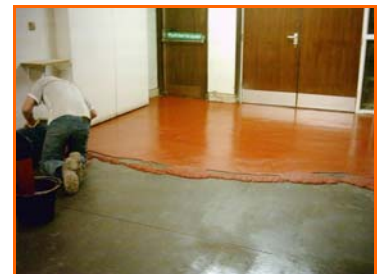

FOOD PRODUCTION

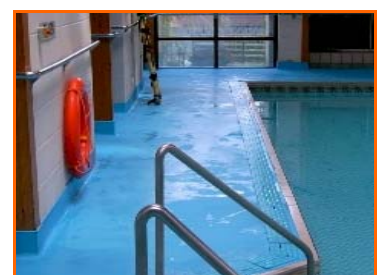

AUTOMOTIVE & ENGINEERING

COATINGS

POLYURETHANE SCREEDS

SLIP RESISTANT SURFACES

---

## PREPARATION.

---

Depending on the results of the survey we carry out before any installation can commence determines the type of preparation required. Large areas of good sound concrete are usually prepared with enclosed shot blasting.

This method achieves the best results providing the perfect finish for bonding resin coatings and screeds. On smaller areas, the same results can be achieved using a vonarx floor planer or grinders which can be small hand held units or larger machines fitted with two or more diamond grinding discs. All these machines are attached to an industrial vacuum which removes the dust and debris created by their operation.

---

## HEALTH & SAFETY.

---

Our in house qualified advisors will provide comprehensive method statements and Risk assessments with all projects undertaken.

---

## OTHER SERVICES.

---

Please contact us for information on the following:

**Temperature Controlled Environments**  
**Stainless Steel Drains and Gullies**  
**Insulated Walls and Doors.**  
**Joint Repairs**  
**Concrete Repairs**  
**Kerb Repairs**  
**Demarcation Lines.**

---

## REMEMBER WE OFFER:

**Free Advice.**

**No Obligation Site Visits.**

**Product Samples.**

**Material Data Sheets and Technical Information.**

**All Available on Request.**
